

Elizabeth Baron's
2008 Annual Psychic Predictions

As Filmed on Location December 18, 2007

BAPS Hindu Mandir – Houston, Texas

QUESTION

Good evening St. Catherine, thank you for being here with us tonight. We are here to ask questions for the yearly predictions, in this case 2008. First question will be, St. Catherine, we are interested in learning more about some natural events in 2008, such as hurricanes, earthquakes, floods, landslides and tsunamis. Can you elaborate on some of these for us for 2008?

SAINT CATHERINE

I see many catastrophes for the year 2008, but it is not important to just look at those hurricanes and those earthquakes, but look at what you can do about them. Because if fifty or more people will get together and pray that there will be peace on earth and you will give out prayers about these things, you will find that some of these hurricanes and earthquakes, and even some of the glaciers, can be stopped from the warming.

It is important to know though that there will be three hurricanes and two windstorms that will be very ferocious and it is important to prepare some funds through giving to the poor at this time. Build up your Red Cross, build up your those facilities that are so good about helping the poor. It is also important to know that Indonesia will suffer again and it is important for Americans, as they

always do, to come through for these good people.

Instead of going out and buying a new television or something else that you don't need, give to the poor at this time, because they certainly will need it in the next year as we go through some of these great catastrophes that will be taking place.

ELIZABETH BARON

It is interesting that she told us that we needed to pray, fifty of us to get together and pray, as we did that a couple of years ago, when there was going to be a hurricane in our area, and we went on the beach and prayed and that hurricane went out to sea. So I really believe in the prayer, because I don't believe that Catherine tells us anything that isn't a warning that we can't prevent. Otherwise, she just doesn't even tell us things.

QUESTION

How about any terrorists' threats? Do you see any of those in the United States, Western Europe, or any of those in other areas of the world?

SAINT CATHERINE

There are terrorism threats all over the world as you know, but we need to look at these people in a different light than we have ever done before. They talk about global warming, but at the same time, the emissions that we, as individuals, are giving out through hate and anger are not helping anyone to

understand that we can love.

Americans are some of the greatest lovers of the world and have given more, as far as charity is concerned, but teach these people with love and understanding. It is not always a good idea to be looking out for threats, it is more important to lift your vibrations by meditating as it is to give out these warnings of hatred and anger because all it does is help the Americans to hate more. We are a loving nation and it is important for each of us to send out love and understanding to those enemies that we have. The greatest prayer on earth is to pray for your enemies.

ELIZABETH BARON

What she is really saying, in that statement, is that she really needs us to send out prayers for everyone in this world, not just for ourselves. We need to pray for those enemies that really want to hurt us. I think that is the main thing that she is saying.

QUESTION

We currently are at war in Afghanistan and in Iraq. Do you see any progress in 2008 and any other possible conflicts that may occur in 2008 and thereafter?

SAINT CATHERINE

As I have stated before, in some of the predictions, the monthly predictions that we have made in 2007, there will be a general that will be hurt and possibly

killed. At that time, because of his leanings in a political arena, that many soldiers will be sent home. But it is important for us to not leave Iraq in a way that we have it at this time, because we have caused so much of the devastation.

The beautiful temples and the beautiful areas that we have devastated through war, cannot be left. We cannot leave any nation in ruins after we get through with the war. So let us build together at this time and think of love among our neighbors. It is very important to do that. If not, there is going to be tremendous problems and tremendous devastation against Israel.

ELIZABETH BARON

Catherine has mentioned this general before, and I think what she is trying to tell us is that when this general is killed, or this leader is killed, whether he is a general or what, the political people over here are going to say, "that's it, let's go home". However, it would be disastrous to leave, it would not be right for us to leave the mess we have over there right now. A lot of people over here are not aware that many of our soldiers are rebuilding buildings, homes, schools and good will over in Iraq right now. They are thinking that everybody is at war over there, but there is also a lot of rebuilding being done.

QUESTION

Would you please tell us a little bit about our economy in these United States in 2008?

SAINT CATHERINE

We have begun living on credit cards, as you know, and that cannot continue to be. We are going to have to look at reality. We must teach our children that they cannot have just anything they want. It is better to tear up these credit cards and just use one of your bankcards at this time. And I am warning many of you because you are going to find that through the housing market and other bits of the economy that are taking place around us, as far as the devastation of our economy, we have to make changes.

We cannot say, oh yes, it is going to be great tomorrow, if we don't make it as individuals. Stop the individual families; teach the families to economize and to give to the missions, instead of hoarding things. We don't ever need to hoard anything because we are a nation of plenty. But, at the same time going through some problems that will last for six years, before we get things even at a (pause), anywhere near what they should be. Not what they have been in the past as we cannot go on living this way. We must plan for new ideas to come into our world at this time, and to love each other above all.

ELIZABETH BARON

When Catherine was asked this question, she could have focused on the stock market, she could have focused on corporate spending, but she was focusing on us as individuals, and I think that she has been telling us this for years, to clean our garages, to teach our children to budget, not to give our children credit cards and send them off to college. This is the best advice she could give us. We really

need to listen to this.

QUESTION

We currently have a lot of different presidential candidates seeking office for the office of the President of the United States. In the final analysis, as we get more towards the election month of November, can you tell us some of the characteristics and the beliefs of the players that might be in the final analysis please?

SAINT CATHERINE

And you know that I will not tell you who is going to be president because a lot of that would be taking away your free will. But I would say to thee, to Black America, that you need to vote for your own kind because you will find that this man will be an honest person, because he has been honest with you so far. It is very important for you to get behind your own people because many people are going to vote for this individual. He is a part of your future, even for those of you who do not care for this person.

I have told you last month, that in December the tables would turn on some of the candidates. It is important to not have someone in the White House who is going to preach us his religion because we need to all have freedom of religion. That is why America was developed in the first place. So do not take away freedom of religion in order to vote in a candidate for the President of the United States.

ELIZABETH BARON

I love the way that Catherine comes across when we ask her about the president, because she never takes away our free will, even though my clients get really mad at me that we don't make decisions for them. I think what she is really saying here is that (pause), I don't so much think she is saying that Obama is going to be president, I think she is saying that Obama has a lot of influence, and he is going to have bigger influence in the future, whether he is President or Vice-President or whatever, for he's got a big future in politics I believe.

And I think the reason that she is pointing him out, I believe, is that it would take away some of our prejudices we are so involved in, in America, and I guess all over the world. But, ah, I am listening, what I am hearing with her saying this, is that we need to be very careful not to have church and state, have that separated, and not vote on someone just because of our religion because we don't need to be preached at in the White House. We need a highly moral President; but we need someone who has those high morals and who will go in but will not try to get us to be a Catholic, or a Mormon, or whatever.

QUESTION

There has been a lot of attention on Iran. Can you tell us, or comment about the true leader of Iran and what his intentions are for the west and for the world?

SAINT CATHERINE

The true leader of Iran, just like the common ordinary person who lives there,

they love America. They don't hate America. It is only the big mouths who are telling us things, and threatening us at all times and threatening the Jews, but the person who really leads Iran does not feel that way at all. It is important not to bomb this nation because if you do, I can assure you that Russia and China and some of the other countries will bring bombs on our own soil, so it is important to take this warning.

ELIZABETH BARON

I really believe that this is one of the most important messages that she has given us. She gave us this six months ago, and said that Russia and China would retaliate if we got involved with bombing Iran. We don't need to bomb anybody anymore. We really need to bring love and peace, according to Catherine. And she has a pretty level head on her shoulders, even if she is a spirit.

QUESTION

Would you enlighten us on any upcoming spiritual or religious leaders in the world, and for those that are already here, would you tell us some of the things that they will be influencing in 2008?

SAINT CATHERINE

It is important to believe in all religions and not have any leader or anyone telling you how to believe because your religion stems from your childhood. It is important to study other people's religions, but you are going to find that more

and more people are going to be turning away from some of their basic religion. This is not right either, because we all need to believe in something.

And (from) what we were taught, we can expand our awareness by looking at our neighbor and seeing what they believe, just as they can give us a good recipe for a Chinese dish or something of that nature. I do not see any one person, at this time, leading spiritually because you are going to find that many of these televangelists, and people who are making so very much money off of everybody, that they will be investigated and many of those will go out of style. The style will be to give to the poor as the Master did two thousand years ago.

ELIZABETH BARON

I like what she says about religion because the whole idea that is getting ready to take place, according to St. Catherine's teachings to us so far, is that all religions will come together. I just recently read a scripture in the Bible about the different religions: one is the head, one is the hand, another is the leg and all that. That is what we really are and if we can come together, not necessarily, it doesn't mean that we have to give up our churches, but we do need to come together with the common belief that we are all God's children and I believe that is what she is trying to say.

QUESTION

We have currently a high profile criminal case involving a individual named Drew Peterson, in the Chicago area. Can you tell us how this case will end?

SAINT CATHERINE

I think you asked me that before, I do not wish to, I will say that this man will be punished, and some of the things that he is doing right now are going to be questioned because he is preparing. He knows that he cannot get by with the death of the third wife. So it is very important for the investigators to keep investigating because they will bring so many things, even though if there weren't a body found, and this could be possible because they are looking in the wrong place, but if they do not find the body, they can still send this man to prison for many things that he has done in the past. I can tell you that people are coming

out of the woodwork because this person is not a very likable person. He would do well to turn to God at this time.

ELIZABETH BARON

Catherine does not like to comment on individual cases like that, but in that particular case, unfortunately he is being tried by the public right now, and so I am very curious on just how this is going to turn out myself, so I am interested in her comments.

QUESTION

Could you please comment on any advances in medicines, such as new drugs, new vaccines, new surgeries, new treatments on any diseases and any other new diseases that might be up and coming in 2008?

SAINT CATHERINE

We are not finished with the bird flu and this is already taking hold in Asia and through airplane trips and travel throughout Asia as we are doing, we can spread this very much so, we have to be very careful with the bird flu. There will be a break through on breast cancer. This is going to be wonderful as there are so many woman who are getting this disease at this time. There will also be the Non-Hodgkin's disease, lymphoma cancer, there is going to be a real break through, that really has already started, but you will find they will be treating many people and they don't have to have a death certificate when they have this

disease.

ELIZABETH BARON

Catherine has been very correct on many of her predictions of break throughs on medicines in the past. We have been doing this since 1987 and the thing about it is that it is not always the same year when these things happen, because when something big is going to happen she'll predict it maybe four years before hand and it goes in these yearly predictions. I am really, as a woman, I'm very happy to hear about the breast cancer as that is one of the biggest fears that a woman has in her life.

QUESTION

Is there any other problem that will occur in America that you haven't discussed with us yet for 2008?

SAINT CATHERINE

In America, the American people are starting to look at themselves as they truly are. They are a loving nation who gives generously to other nations, but we need to take care of the poor in this country and you are going to find that through people like this young man that is running for president, even in another lesser position, this person will be looking at the poor because he sees his own people suffering so much. Also, you are going to find that prejudices will be less and less as more and more people of all walks and of all races will get involved with the government. It is important, as you choose the person that you wish to have as President of the United States, that as you choose their morals because

the Lord knows that we need more morals in this country.

ELIZABETH BARON

I believe that what Catherine is saying in this answer is that charity begins at home and that when you look all across our nation, we have so much poverty ourselves, young people are having such a hard time with their homes, getting repossessed and foreclosed on, and this is something that we really need to listen to.

QUESTION

Do you see any new inventions or discoveries or scientific research that might be important for 2008?

SAINT CATHERINE

They have laughed and laughed about UFOs but there are many contacts that will be made that they will not be able to laugh about. There are many inventions and many bits of knowledge that are given to us by people that are from other planets, but we are laughing our heads off, because we laugh about anything that we don't understand. We actually fear that there might be life on other planets, but there is and we must look at that because within the next four years it will (be) proven beyond belief that there is not only life on other planets, but we will be accepting and acknowledging the visitations that have been going on for thousands of years.

ELIZABETH BARON

I am so glad that she said that because I've had my own experiences with aliens and I think that its time for us to accept that this little ole earth is not the only place that there are beings. There may be spiritual beings on some planets that we have even looked at already, like Mars, but also, we have to realize that there are many of these UFOs and aliens that know how to disappear right before your very eyes. So I love that fact that she has brought this in.

QUESTION

For years researchers, scholars and scientists have often wondered about some of the more perplexing and enigmatic of unsolved mysteries that the world has seen. Will there be any new discoveries or revelations regarding this in the year 2008?

SAINT CATHERINE

The Arc of the Covenant will be discovered, mainly because it needs to be. People need to have faith in the teachings of David, teachings of the Old Testament. This will be discovered. These people are afraid, and afraid to let the Arc of the Covenant go as they are afraid that it might be tarnished as just as things that we do quite often tarnish other people's belief system. You will see that if not this year, within the next four years there will definitely be knowledge of the Arc of the Covenant. It is not at all what people think it is. It will be kind

of a shock to the religious leaders across the world.

ELIZABETH BARON

She has mentioned many times about the Arc of the Covenant before, and she has told us a few years ago that it would not be discovered, think some people had the feeling that they would be discovering it, but what she is talking about here with the people would not let it go. She is saying that it is in the possession of people that are holding onto it, so it will be discovered, she is saying.

QUESTION

Will there be religious or spiritual awakenings in 2008 that you wish to tell us about?

SAINT CATHERINE

If everyone in the whole world sat down for five minutes and meditated together there would never be another war because each of you would stop the war within yourself and attend to your own problems. And so, you will see meditation being accepted in so many ways. Of course we know through the American medical association and other medical authorities that meditation slows down blood pressure and it helps you have more self control and accept more self-responsibility. We need this so badly as we get so involved in our immorality of the world at this time.

ELIZABETH BARON

Since Catherine first came to me, in 1979, she has told me, over and over, that I have a two-fold purpose. The first is to give life readings to people, to show them their best part of them, the God part of them, to show them their purpose. The second, that I should never walk away from someone who comes to me for guidance without telling them that they too have this ability that I have, if they will learn to meditate and open up their spiritual centers. And so, what I am doing across the world now is teaching people to meditate, to lift their vibrations and have had great success with it. So I hope that you get out of these predictions, if you don't get anything else out, is try meditating as it is really good for the soul.

QUESTION

Please discuss any topics that we haven't discussed so far that you would like us to know about for 2008.

SAINT CATHERINE

America is a very naïve country when it comes to trusting other countries. It is important not to give aid to those who are planning against you at this time. And there are billions of dollars going out to aid to enemy countries, but you don't call them enemy countries, you call them allies. So please check into that, because before you know it, they will own America. And then as some great man said once, "We will take you down without lifting a finger."

ELIZABETH BARON

When I watch the news at night, I always look at this whole situation, how many dollars are being spent on enemy countries. I'm not talking about feeding the poor, she is not talking about feeding the poor; she is talking about to build up weapons to be used against us. We need a president who is going to do something about that. Boy our world, our America, needs a lot of financial help right now to pull us out of the doldrums with Katrina and other tragedies that we will have in the future. So, we need a little bit of stock piling too.
